

# Carbon Monoxide Monitors

## Combination Dewpoint/CO Monitor

This combination monitor is applicable for both refrigerated and desiccant dryers. It has a range of -112 degrees to +68 degrees F. CO detection range is 0 to 100 ppm. Enclosed in a NEMA-4X case, it is powered by 110 VAC. The dewpoint sensor is automatically calibrated by a microprocessor.

Combination Dewpoint/CO Monitor	233013
Dewpoint Only Monitor	233029

## Carbon Monoxide Monitor

Similar to combination unit above, but without dewpoint monitoring feature. Monitors only CO. This unit features an Alarm Reset function.

Carbon Monoxide Monitor	233028
Calibration Kit (inc. Connector and 20 ppm Test Gas)	233015
20 ppm Test Gas Only	262791
Impurity-Free Air Test Gas	262792
CO Sensor, Chemical Cell	262787
Humidifier for CO Monitor	2610-001
