

OMC Oil-less Piston Compressors

Ohio Medical oil-less piston compressors provide clean, high quality compressed air for medical and laboratory applications. They feature aluminum alloy cylinders and pistons for durability and consistent performance. The crankshaft is made of durable ductile cast iron. The sealed bearings assure long term performance. Compressor modules include the compressor, motor, belt with guard, temperature switches on each cylinder, unloader solenoid, and aftercooler, all mounted on a common base. Ohio Medical compressor modules are great replacements for many older oil-free and oil-less compressors. Call on our Customer Support team to help select the right module for your system.

Model	P3-M	P5-M	P7-M	P10-M	P15-M	P20-M	P25-M	P30-M
Part #	100-0220	100-0221	100-0222	100-0223	100-0224	100-0225	100-0226	100-0227
Motor HP	3	5	7.5	10	15	20	25	30
Capacity @ 50 PSI (CFM)	11	23	31.2	38	60	76	92	108
Capacity @ 100 PSI (CFM)	9.8	19.5	25.9	33.5	57	62	76	93
