

Filters: Heavy Duty

Larger inlet vacuum filters have high dirt-holding capacity. Standard models have paper elements; polyester and high heat (to 385°F) versions also available. Access to elements is easy through the use of heavy duty T-bolts. Housings are all-steel construction with baked enamel finish. All housings have 1/4" inlet/outlet gauge taps. Inlet and outlet connections are MPT.

Part # with Paper Element	233784	233785	233786	233787
